

## BEML PRESENECE IN MIDDLE EAST REGION

BEML boasts a strong global presence, having supplied Mining and Construction Equipment valued at over USD 70 million across the Middle East. The company's machinery is widely recognized for its reliability and performance in various applications. Key countries in the region where BEML's equipment has made a significant impact include:

- **Syria:** BEML has been a prominent supplier of Mining and Construction Equipment to Syria since 1998, delivering more than 170 units—including Dump Trucks, Bulldozers, Motor Graders, Water Sprinklers, And Tyre Handlers—valued at over USD 38.34 million. This equipment has primarily been utilized in Phosphate Mining operations.

- **Saudi Arabia:** BEML has supplied over 70 units of Mining and Construction Equipment for limestone mining projects in Saudi Arabia. This includes 60T Dumpers (BH60M), 100T Hydraulic Excavators (BE1000-1), 410HP (BD355) and 320HP (BD155) Dozers, various capacity Pipe Layers, Graders, Tyre Handlers, and Loaders, with a total value of USD 22.50 million.

- **UAE:** Since 1996, BEML has been a trusted supplier of Mining and Construction Equipment to the UAE, delivering 40+ machines, including a wide range of Dumpers, Dozers, and Excavators. This high-quality equipment has been primarily deployed in limestone mining projects, contributing significantly to the region's mining operations. BEML's commitment to excellence and innovation ensures that their machinery meets the demanding needs of the industry.

- **Oman:** BEML's Mining and Construction Equipment has also established a remarkable presence in Oman, where its machinery is actively used for limestone mining. The company has supplied high-performance machines, including Dozers, Dumpers, Excavators, and Pipe Layers. This robust lineup supports the region's mining operations, showcasing BEML's commitment to providing reliable and efficient solutions tailored to the industry's needs.
