BEML Leads India Pavilion at Land Forces 2024 Global Expo in Melbourne

Melbourne, September 11, 2024: BEML Limited, a premier manufacturer of mining and defense equipment, made a significant impact at the Land Forces 2024 Global Exposition in Melbourne, Australia. As the leader of the India Pavilion, BEML showcased its advanced defense manufacturing capabilities alongside DRDO and Yantra Ltd, marking a strong presence from September 11-13. This participation underlines BEML's efforts to expand its global footprint and cater to the rising demand for cutting-edge and reliable machinery in the mining and defense sectors.

The India Pavilion was inaugurated by Shri Sanjay Seth, Minister of State for Defence, in the esteemed company of Shri Shantanu Roy, CMD of BEML Ltd., Dr. Sushil Kumar, Consul General in Melbourne, and top officials from the Indian Army. The pavilion attracted a significant number of visitors who explored BEML's equipment and land systems, reflecting global interest in Indian defense innovation.

BEML has established itself as a trusted partner for high-quality, innovative solutions, exporting to over 72 countries. Its global success is fueled by strong demand in regions with robust mining activities and substantial defense budgets, where BEML's reputation for excellence continues to grow.

At Land Forces 2024, BEML highlighted its flagship products, including:

Sarvatra Bridging Solutions

High Mobility Vehicles (HMs)

Transport and Radar Systems

Arjun Armoured Recovery and Repair Vehicles (ARRVs)

Ground Handling Equipment (GHE) and Ground Support Equipment (GSE) for Aerospace

Open Cast and Underground Mining Equipment

Unmanned Aerial Vehicles (UAVs)

Future capabilities in Maritime Engineering

Renowned for durability and advanced technology, BEML's product range spans from mining equipment like excavators, dump trucks, and loaders to defense products such as artillery, missile launchers, and armored vehicles. BEML's dedication to continuous innovation and superior quality has earned the company a strong global customer base and numerous accolades.

As part of its strategic expansion, BEML is integrating AI-based technologies into its equipment to enhance efficiency, safety, and environmental sustainability. This smart technology aims to meet the evolving needs of the global mining and defense industries, offering customers intelligent and future-ready solutions.

To further bolster its expansion, BEML is actively pursuing strategic partnerships and collaborations with local companies in Australia and Europe. These alliances will help localize BEML's products and ensure compliance with regional standards and regulations, while advancing the Indian government's 'Make in India' initiative.
